Review

Waters and forests: from historical controversy to scientific debate
V. Andréassian 1

Research Papers

Two-dimensional kinematic wave model of overland-flow
Q. Q. Liu, L. Chen, J. C. Li and V. P. Singh. 28
Sampling variances of regional flood quantiles affected by intersite correlation
M. Bayazit and B. Önöz 42
A neuro-fuzzy computing technique for modeling hydrological time series
P. C. Nayak, K. P. Sudheer, D. M. Rangan and K. S. Ramasastri. 52
Hydromechanical modeling of a large moving rock slope inferred from slope levelling coupled to spring long-term hydrochemical monitoring: example of the La Clapière landslide (Southern Alps, France)
F. Cappa, Y. Guglielmi, V. M. Soukatchoff, J. Mudry, C. Bertrand and A. Charmoille 67
Hydrological and chemical budgets in a volcanic caldera lake: Lake Kussharo, Hokkaido, Japan
K. A. Chikita, M. Nishi, R. Fukuyama and K. Hamahara. 91
A dynamic model for predicting hydrologic response to land cover changes in gauged and ungauged catchments
B. F. W. Croke, W. S. Merritt and A. J. Jakeman 115
Homogeneous pooling group delineation for flood frequency analysis using a fuzzy expert system with genetic enhancement
C. Shu and D. H. Burn. 132

Discussions

Comments on "Water flux estimates from a Belgian Scots pine stand: a comparison of different approaches" by L. Meiresonne, D. A. Sampson, A.S. Kowalski, I. A. Janssens, N. Nadezhdina, J. Cermák, J. Van Slycken, R. Ceulemans, Journal of Hydrology, 2003, 230–252
F. Hupet and M. Vanclooster 150
Replies to the comments by F. Hupet, M. Vanclooster on 'Water flux estimates from a Belgian Scots pine stand: a comparison of different approaches'
L. Meiresonne, D. A. Sampson, A. S. Kowalski, I. A. Janssens, N. Nadezhdina, J. Cermak, J. Van Slycken and R. Ceulemans 154

Vol. 291, Nos. 3–4 **June 1, 2004**

Special Issue: Catchment modelling: Towards an improved representation of the hydrological processes in real-time world model applications

Editorial

"Catchment modelling: towards an improved representation of the hydrological processes in real-world model applications"
A. Montanari and S. Uhlenbrook 159

Research Papers

The hillslope-storage Boussinesq model for non-constant bedrock slope
A. G. J. Hilberts, E. E. van Loon, P. A. Troch and C. Paniconi 160
Using tracers to upscale flow path understanding in mesoscale mountainous catchments: two examples from Scotland
C. Soulsby, P. J. Rodgers, J. Petry, D. M. Hannah, I. A. Malcolm and S. M. Dunn. 174
Scale appropriate modelling: representing cause-and-effect relationships in nitrate pollution at the catchment scale for the purpose of catchment scale planning
P. Quinn 197
A nested catchment approach for defining the hydrological controls on non-point phosphorus transport
T. M. Scanlon, G. Kiely and Q. Xie 218

doi: 10.1016/S0022-1694(04)00166-0

Analysis of the effects of different scenarios of historical data availability on the calibration of a spatially-distributed hydrological model
A. Brath, A. Montanari and E. Toth 232
Constraining dynamic TOPMODEL responses for imprecise water table information using fuzzy rule based performance measures
J. E. Freer, H. McMillan, J. J. McDonnell and K. J. Beven 254
Hydrological process representation at the meso-scale: the potential of a distributed, conceptual catchment model
S. Uhlenbrook, S. Roser and N. Tilch 278
Hydrology laboratory research modeling system (HL-RMS) of the US national weather service
V. Koren, S. Reed, M. Smith, Z. Zhang and D.-J. Seo 297
